# CAMS-Web Known Issues Gotcha

## Displaying known issues on map.

Known issues are not shown on the map when using the default "Public rights of way" mode. "Track an issue" is available ( in v2.4.2 but not in v2.3.4 ), and brings up a search box, before logging in but the general map does not show knows issues in yellow triangles. To see known issues on the map it may be necessary to log in and select "Track an issue" or "Report an issue" and be displaying the map with the scale showing at most 200m.

Above discovered by trail and error using CAMS Web v2.4.2 ( Buckinghamshire ) and v2.3.4 ( Oxfordshire )
